CUMULATIVE EDITORIAL INDEX

Including January 1970 through June 1970. Number preceding hyphen is month of issue; those following are page numbers. Asterisks indicate items appearing in departments. AUTOMATION *is indexed in the Applied Science & Technology Index and the Engineering Index, available in libraries generally. Microfilm copies are available from University Microfilms, 300 N. Zeeb Rd., Ann Arbor, Mich. 48106. Reprints of early issues are available from Johnson Reprint Corp., 111 Fifth Ave., New York, N. Y. 10003.*

A

Abrasive machining, continuous process, 6-14*
Acoustic emission testing, 5-12*
Adams, J., Understanding Adaptive Control, 3-108
Adaptive control, 1-14*, 3-108, 4-20*
Aidlin, S. D., Feeding Plastic Bottles, 1-58
Aidlin, S. S., Feeding Plastic Bottles, 1-58
Air jet conveyor, 1-86
Allen, M., Planning for EDP, 1-81
Australian computer usage, 4-10*
Automatic manufacturing, missiles, 1-22*
Automation, expenditures for, 1970, 1-9*
  management appraisal, 4-48
Automobile industry, manufacturing computer uses, 2-20*

B

Balancing electric motor rotors, prob., 2-6*
Ball memory devices, 3-114
Barlow, J., Government Influences Production Equipment Investment, 1-63
Bending tubing, numerical control, 2-47
Bernard, J. W., Organizing Multilevel Process Control Systems, 3-78
Bin design, weigh feeding, 2-77
Bobroff, D. A., Computer Controlled Testing, 3-118
Boothroyd, G., Designing Gravity Feed Tracks, 5-96
Burlingham, C., Guest editorial, material influence on process, 2-57

C

Capital expenditures, justification, 5-75
Casting, moldmaking, automated, 4-16*
Ceramic molds, for diecasting, 3-19*
Chorkey, W. J., Applying Hydraulic Shock Absorbers, 1-90
Coatings, high-speed curing, steel strip, 6-14*
Coding, handling control, 2-51
Communicator, desk-top, 1-12*
Compression, air and gas, 1-127*
Computer-aided design, manufacturing engineering, 4-65
  measuring system, 5-14*
Computer control, papermaking process, 1-84
  in transportation, 5-10*
Computer developments, pattern response systems, 2-11*
  industry, forecast, 2-11*
  management, problems in the 70s, 6-8*
  /microfilm systems, 3-10*
  monitoring, packaging line, 4-14*
  power supplies, 6-95
  prices, 6-16*
  programming, 6-137*
  security, 6-85
  service costs, after unbundling, 1-12*
  software guidelines, 6-137*
  terminal, portable, 3-9*
  training center, 1-10*
  trends, 3-87
  utilization, optimum, 2-84
Computerized production, 3-9*, 6-50
Computers, aid document preparation, 2-12*
  applied to information systems, 4-93
  digital, 1-127*
  fire protection, 4-22*
  fourth generation, 1-10*
  future in manufacturing, 6-50
  information sources, 2-124*
  management understanding of, 4-134*
  in manufacturing processes, 2-20*
  monitoring machine tools, 6-67
  obsolescence, 2-84
  operating systems, 4-134*
  planning machine tool operations, 6-56
  systems theory, 6-137*
  testing, control of, 3-118
  time-sharing, 2-12*, 6-91
  in warehousing, 1-46
Confidential data files, protecting, 6-85
Contamination control, 1-127*
Contracts, handling systems, 4-83
Controlling industrial noise, 3-70
  paper web temperature, prob., 6-4*
Control, ball memory devices, 3-114
  computer, papermaking process, 1-84
  computer, testing, 3-118
  direct digital, 4-134*
  gaging, automatic, 3-12*
  malfunction detecting, 3-75*
  minicomputer, dedicated, 4-12*
  numerical, 1-127*
  process, organization of mulitlevel systems, 3-78
  trends, 3-87
Controls, adaptive, 1-14*, 3-108, 4-20*
  computers, 2-124*
  discontinuous systems, 2-124*
  electrical safety practices, 1-127*
  fire protection, 4-22*
  galvanizing line, 1-14*
  hydraulic shock absorbers, 1-90
  integrated circuits, 2-124*
  lasers, chemical energy, 1-14*
  lightguides, laser, 4-20*
  minicomputer selection, 5-102
  numeric display devices, 4-20*
  photoelectric, 2-14*
  programmer, audio-visual, 3-14*
  research and development efforts, 4-20*
  sequence circuit design, 4-52
  temperature measurement, 6-16*
Cross, H., Automation in Perspective, 4-48
Conveying lengths of hose, prob., 2-6*
Cost justification, 5-75
Crain, J., Pneumatic Logic Control, 3-105

D

Data collection, 6-67
  concentrator controller, 6-67
  files, protecting, 6-85
  management, 2-124*
Data processing, communicating with computers, 6-60
  meter reading, automatic, 4-12*
  terminals for managers, 4-12*
Decision center, 5-20*
Depreciation, 2-9*
  on production equipment, 1-63
Design, process control systems, 3-78
Diecasting, ceramic molds, 3-19*
Direct numerical control, manufacturing engineering, 4-65
Dodge, L. A., Evaluating Flow Measurement Accuracy, 5-63

E

Economics, capital request form, 2-42
  justification, capital investments, 2-42
EDP department, 5-16*
  education, 3-10*
  personnel, turnover, 6-10*
  planning, 1-81
Electrocoating, production painting, 4-87
Electromagnetic metal forming, 5-69
Electromechanical ball memory, 3-114
Electron beam welder, 1-21*
Electro-optical sorting, 1-53
Encoder, magnetic tape, 2-12*
Engineers, shortage, 2-9*
Executive ages, 5-9*
Exploratory control, adaptive, 3-108

F

Feasibility study, machine tool, 6-56
Feed track, design, 5-96
Feeding, plastic bottles, 1-58
Filling pipes with concrete, prob., 1-6*
Flow meters, accuracy of, 5-63
  design and installation, 6-137*
Fluid control, miniature moving part devices, 3-105
Fluid depth indicator, 2-14*
Fluid power, glossary of terms, 6-137*
Fluidics, mail handling, 5-14*
  sequence circuits, 4-52
Forging steels, 2-59
Formability, cold materials, 2-59
Foulk, D., Guest editorial, social concern and technology, 3-85

G

Gaging, automatic, 3-12*
  wall thickness, 1-14*
Gilmore, D. R., Efficient Weigh Feeding, 2-77
Government influences production equipment investment, 1-63
Graham, P., Cost Justification, 5-75
Greening, J. H., Perils of Upgrading Manufacturing Processes, 5-58
Grinder, cross slide ways, 1-21*
Gyroscopes, design and theory, 1-127*

H

Handling, adjustable cargo deck, 3-16*
  by air jets, 1-86
  axial leaded components, prob., 2-6*
  contracts for systems, 4-83
  control, coding, 2-51
  feed track design, 5-96
  magnetic jig, 3-16*
  manipulator boom, 6-20*
  pallet loader optimization, 3-18*
  plastic bottles, 1-58
  robots, 6-20*
  systematic analysis, 5-151*
  vacuum blanket, 5-10*

transfer machines, 7-46

M

Machine tool, development in the 70s, 9-75
show, 9-9*
Machines, welding, automated line, 9-96
Machining, abrasive, 9-69
engine block transfer line, 10-14*
photochemical, 8-22
Machinists, degree program, 12-7*
Magnetic drum, computer storage, 10-66
strip, computer storage, 10-66
tape, computer storage, 10-66
Mahal, R. G., Guest editorial, manufacturing engineering liaison, 7-49
Management, automation and industrial labor, 7-107*
change agents, 10-36
computer system guide, 9-152*
consultant relationship, 12-40
financing equipment, 9-60
impact of computers upon, 7-42
information systems, computers, 7-107*
physical distribution, 10-11*
understanding technology, 8-16
Managerial effectiveness, 8-100*
Manelis, R. E., Enriching Creative Talents, 7-34
Manufacturing systems, 7-51
simulation, 10-63
Materials handling, air film systems, 12-68
McCarthy, D. V., Financing Equipment Acquisitions, 9-60
McRainey, J. H., The Challenge of Technology, 8-16
$ and Sense Partners in Solving Handling Problems, 12-40
Measuring, dimensional, 9-152*
photoelectric system, 7-13*
Mechanical predetermining counters, 10-45
Memory, devices, 10-66
stacker storage, 12-59
Microelectronic technology, 12-9*
Microwave curing, GRP materials, 9-63
Minicomputer, cam cutting control, 11-13*
Moving heavy loads, air film technology, 12-68
Murch, L. E., On-Off Control of Parts Feeding, 8-32

N

Noise control, 7-107*
Noonan, R. P., Testing and Inspecting with Computers, 8-27
NSPE membership change, 7-7*
Nuclear fuel manufacturing, 7-16*
Numerical control, computer actuated, 7-12*
computer-directed, 9-9*
machine tools, 9-75
Numerical methods, 7-107*

O

Obergefell, R. F., Lubricating Transfer Machines, 7-46

P

Packaging plastic connectors, prob., 11-6*
Papermaking, dry process, 11-12*
Photochemical machining, 8-22
Photoelectric measuring system, 7-13*
Photosensors, 12-9*
Phototransistors, solid-state, 12-9*
Plasma arc techniques, 7-76
Plastics, coating, 9-98
injection molding, 10-55
Pneumatic sensing, thickness, 8-7*
Pollution, damage payments, 11-9*
liability, 7-7*
technicians, 10-7*
Power transmission, flexible shafts for, 8-36
Press automation, 9-93
Pressure, solid-state transducer, 12-9*
Problem solving, creativity, 7-34
Processes, plastics coating, 9-98
Production processes, photochemical machining, 8-22
Productivity, increasing, 9-75
Programmed chassis wiring, 8-10*
Project control systems, 9-152*
Projection welding, techniques for, 9-96
Pryatel, F. J., Guest editorial, computer/machine tool advancements, 8-43

R

Radio-frequency heating, GRP materials, 9-63
Reading data on plastic cards, prob., 9-6*
Relationships, consultants/users/suppliers, 12-40
Reliability, fluidic devices, 11-71
Resistance welding, techniques for, 9-96
Retirement benefits, 8-5*
Robots, clamping devices for, 12-47
shot peening, 8-8*
Rollis, R. T., Guest editorial, technological change, 9-73

S

Self-instruction, technical subjects, 7-7*
Semiconductors, applications, 9-152*
Sensing, freight car identification, 10-10*
phototransistors, 12-9*
Shafts, flexible, 8-36
Shenk, R. F., Photochemical Machining of Thin Metal Parts, 8-22
Simulation, 11-42
large manufacturing systems, 10-63
stacker throughput, 7-80
strip metal processing, 12-8*
Sindelar, W. E., Automating Press Operations, 9-93
Soldering, printed circuit boards, 11-61
Spiral feeders, vibratory, 12-62
Spot welding, automated line, 9-96
Switches, limit, 7-62
Sylvester, G. R., Coating with Plasmas, 7-76
Synchronizing multiple presses, 9-93
Systems engineering, 7-51

T

Technician exams, 9-10*
Teflon, use in acid plants, 9-16*
Television monitor, assembly machine, 10-10*
Terminology, computer, 7-73
Testing, classifying and sorting chips, 8-7*
computerized, 8-27
Titanium coating process, 7-18*
Toolmakers, degree program, 12-7*
Toth, W. L., Coating Products with Plastics, 9-98
Training, youth job, 10-7*
Transceiver, order processing, 11-15*
Transfer, line, engine block machining, 10-14*
machines, lubrication, 7-46
machine, small parts, 8-10*
presses, automated, 9-93

U

Ultrasonic industry council, 9-16*
Unemployed engineer registry, 12-7*
Ustin, M. D., Examining Limit Switch Problems, 7-62

V

Vibration control, 7-107*
Vibratory feeders, spiral, 12-62
upper limits for feeding, 11-45
Visual acuity, 12-7*

W

Wage negotiations, 9-10*
Wavesoldering, printed circuit boards, 11-61
Welding, automated line, 9-96
thin metal, laser used, 7-20*
Wickes, T. A., Agents of Change, 10-36
Wire wrapping, card reader aids, 8-10*
Worden, W. L., Conveying Odd-Shaped Objects, 12-66
Worley, P. E., Jr., Choose the Right Predetermining Counter, 10-45
